

-Bicycle Locking Procedures-

Proper

-GOOD-

Lock the frame of the bike to an immobile object with a Kryptonite U-lock.

Improper

-POOR-

Cable and chain locking devices are easily cut.

-BETTER-

Lock the frame and front wheel of the bike to an immobile object with a Kryptonite U-lock.

-POORER-

Bicycles locked to themselves are easily picked up and carried away.

-BEST-

Lock the front wheel, back wheel, and frame of the bike to an immobile object with a Kryptonite U-lock.

-POOREST-

Bicycles left unlocked are simply ridden away.
